Meeting Minutes

Date: 2/6/2023

2. Work with local government to designate any additional income, resulting from changes in legal status of marijuana, to prevention.

- a. Who (from the coalition)** should be involved in this conversation? “Everyone”
 - i. Who feels **comfortable** having this conversation? Tyler
 - ii. Who would be on the **other side** of this conversation? Fiscal Court
 1. If a proposal such as a smoke-free policy is rejected, it takes approximately 8 years before that audience is prepared to entertain the notion again
 2. Judge Exec Dills is not in favor of mandating anything county wide - he would prefer that city adopt on their own first
- b. When** should this conversation take place? ASAP - unanimous again
- c. Why** should income be designated to prevention?
 - Investing in the future
 - TRANSPARENCY!
 - Educate on dangers - provide parents and families with information
 - Cheaper to prevent than treat
 - To be proactive and not reactive
- d. How** should income be designated to prevention?
 - By priority
 - Strategically planned → how much? for what purpose? Use history of successes - statistics and facts
 - Placing an equal balance between the two
 - Work with a coalition - local/state politicians may not be knowledgeable with prevention and may not know how to properly spend funds

Next Steps

- Create reasonable timeline
- Engage youth in the legalization conversation
- Create a one page for the faith community
- Create talking points based on unintended consequences
- Determine who is comfortable participating in the conversation
- Gauge partner interest/ability to submit joint request for moratorium
- Start planning specific request for funding amount and purpose
